## coffee class

Bring barista-quality coffee home with these latest innovations to hit the caffeine scene.

1. KitchenAid's new Craft Coffee range is influenced by alternative brewing methods. Our favourites include the 'Siphon' coffee brewer, \$279 (far left), and the 'Precision Press' coffee maker, \$149, and both are designed for those who enjoy an aromatic flavour; kitchenaid.com.

2. Nespresso's Progidio&Milk machine lets you control your brewer with your smartphone - in other words, make coffee from your couch. Use the Nespresso smartphone app (it's free to download from the App Store and Google Play) to create your preferred brew and receive reminders when you're low on capsules or due for machine maintenance. It costs \$399 and is available from Nespresso boutiques and online; nespresso.com.
